To whom it may concern,

RE: Brown Nationalease

Siegwerk USA Co. has been a customer of Brown Nationalease since 2007. This has been a very beneficial relationship between our two companies from day one. Brown Nationalease helped our company's private semi and dry van fleet triple in size overnight with a very smooth transition and support system.

Ray Swesey and the entire staff at Brown Nationalease provide a high level of account service and the maintenance expected of our company. They got us the right trucks and provide reliable service our fleet needs to assure we can count on them going down the road. When a mechanical issue arises in the fleet due to the manufacturer, the team is ready to discuss options and directly involves my team for input like a partnership should work.

We use a lot of their services besides just leasing trucks and trailers. They help keep our equipment clean and looking sharp, as well as annual inspections and compliance with the DOT. Their primary shop for our location is only 2 blocks away...can't get much closer. This saves us a lot of driver time!

We recently turned our fleet of tractors, but before we did, Ray connected me with the right folks to really go through the specs of the new tractors prior to the final order. This has resulted in significant fuel saving starting day one.

These are just a few examples of the excellent team Brown Nationalease has in place. I personally value them for what they have helped me with getting and keeping our private fleet going strong.

Sincerely,

Randall J. Rothfus
Distribution and Logistics Manager
